

# DNA Analysis

We are doing three days of "DNA Heavy" topics. This is going to be a mixture party. The presenters will be John Butler (NIST and SWGDAM Mixture Chair), Bruce Heidebrecht (MD State Police), Steven Myers (CAL DOJ), and Brian Burritt (San Diego). They will each present for half a day on their approach to mixtures (each participant will get to see each presenter). The third day will be a round table discussion of real life mixtures for the panel of Bruce, Brian, and Steven to work out.
